

Bryony Turford

I am mum to a pupil currently in Year 11 at The Snaith School. I was a co-opted governor at Kellington Primary School for 6 years with 4 of those as vice-chair. During that time we oversaw the creation of and joining of the new STAR multi-academy trust and Kellington becoming an academy. My professional working life has involved working with and for several other Yorkshire based MATs at both primary and secondary. I bring with me lots of experience of education and governance

My professional life has included delivering high quality professional development for leaders, classroom practitioners, trainees and ECTs for over 17 years. I am a Chartered Science Teacher (CSciTeach) and have a CPD Mark as a lead facilitator. I co-authored the recently published '100 ideas for Primary Teachers – Science' from Bloomsbury and was part of the author team for SNAP science, a primary framework for teaching.

As the Senior Regional Hub Leader for the Primary Science Quality Mark (PSQM) for Yorkshire and the Humber I am also a proud fellow of the Primary Science Teaching Trust (PSTT)

I hold a number of part time roles including with the SEERIH team at the University of Manchester and as a freelance primary science consultant. I am passionate about all things education, especially primary science and inspiring teachers and children to make learning engaging, hands-on and meaningful.
