

As well as a member of staff at The Snaith School, I am a former student and mother of two daughters who also attended the school.

Joining the school's support staff back in 2003, I initially worked as a Receptionist before changing roles to become a Data/Finance Assistant. In 2010 I took up the position of Careers Adviser which provided me with the opportunity to step outside of the office and work more closely with students in both one to one and classroom environments. Since 2017 I have held the the role of Data Manager, managing the school's information system, timetable and exams.

Thanks to the school's commitment to continued professional development, during my employment I have gained a Level 4 qualification in Information, Advice & Guidance and a Level 5 qualification in Leadership & Management.
